

Confidential Audit of your Overheads

What would you do with £847,000 in additional cash per year?
 What value do you put on 30 minutes of your time?

Do you want to recover some of your lost profit from your overheads, to;

- improve your cash flow?
- increase your EBITDA?
- uplift the valuation of your company?

Under NDA, Auditel will carry out a confidential benchmark review of your costs and highlight where savings can be made – all we need is a 12 months supplier spend report.

WHAT YOU WILL GET?

A report detailing procurement expenditure across all suppliers, grouped by category. Based on our experience and benchmark of your sector we will identify where savings can be achieved and how you compare to your peers.

MINIMAL TIME COMMITMENT

We know how busy you are.

We suggest having an initial 30-minute meeting to be held on Zoom or Teams to minimise your time commitment, for us, to understand any current issues you may want to share with us regarding your organisation, systems, processes and suppliers.

All we then need is a copy of 12 months supplier spend report. This will give us the raw data we need to carry out your no obligation report which identifies where savings can be implemented. We would then compile the results into a short overview report and arrange a video call with you to debrief.

WHAT HAPPENS WITH THE REPORT?

This is up to you. Our report will identify what we hope will be a big number. **For one of our clients, we identified £847,000 in annual savings. Not too bad for a half hour video call!**

You may decide to do nothing, or we can discuss terms of engagement in order that we can start the implementation process and begin to save you time, money and stress.

We cannot guarantee that we will be able to assist you as it all depends on what we find. However, at the very least, you will be left with an informative review highlighting cost areas where there is room for improvement. We are paid for results, not reports.

In a changed business world, there has never been a better time to review your entire indirect overhead spend and see where you stand.
