

Helping Manufacturers make effective and informed procurement decisions

EXPERTISE WHEN YOU NEED IT

Auditel provide the perfect recipe for kitchen company Anglia Factors

“Since being introduced to Auditel, they’ve managed my energy and telecoms without a hitch, letting me get on with building my business – whilst still being in control of who supplies us, and on what terms.”

Managing Director, Anglia Factors

Providing invaluable resources and overhead cost expertise to manufacturers

In the current challenging economic climate, the UK manufacturing sector is battling with the desire to drive growth and profitability while ensuring that they are investing in the right technologies and suppliers for their futures.

EXPERTISE WHEN YOU NEED IT

From our experience, we recognise that it is not financially feasible for manufacturers to employ full-time procurement specialists across the full spectrum of goods and services that can be purchased.

These challenges culminate in non-purchasing trained staff making significant purchasing decisions without the tools or knowledge of the supplier market.

This puts them at a huge disadvantage when negotiating with suppliers that have a very clear understanding of the real costs and the margins built into contracts.

When engaged at the right time, independent external help that works alongside your existing managers can level the playing field, thereby ensuring you achieve the very best value for money from your suppliers.

STRENGTHENING YOUR NEGOTIATING POSITION

Founded in 1994, Auditel was established to help organisations make effective and informed procurement decisions within a rapidly evolving market. Since then, Auditel have built a strong network of over 100 procurement specialists and are continually innovating our service - becoming a leading procurement and supply chain management consultancy.

Auditel's procurement specialists work alongside your existing finance and operational teams providing the external help to deliver business transformation and a competitive advantage. This is due to our vast expertise and detailed knowledge of suppliers, and which of these suppliers can deliver innovation and services at the most competitive prices.

Procurement specialists on your side

Poor procurement of regular overhead costs can be the silent killer of performance for any manufacturer.

OPERATIONAL ASSUMPTIONS AND CHALLENGES

With the UK firmly embedded in the Fourth Industrial Revolution, in which disruptive technologies and trends such as the Internet of Things, Robotics, Virtual Reality and Artificial Intelligence are changing the way we live and work, the need for a manufacturer's procurement function to embrace new ideas and technologies within their supply chain has never been greater.

It is not uncommon, when we first engage with a new client, for them to believe that their procurement is under control and any improvements we could achieve would be insignificant and not worth pursuing. Many believe that 'as long as the spend is within budget and the supplier is delivering in accordance with the contract and service level agreement, then all is well.'

This is a natural response and we fully understand this initial reaction. However, without independent benchmarking and validation of pricing and service level arrangements, it's impossible to know if you are receiving value for money or the desired quality.

From our 25+ years of experience, working with thousands of clients and organisations, manufacturers are typically over-paying for goods and services by up to 50% whilst missing out on innovation. If addressed, this can have a positive impact on overall performance.

Below are a few operational assumptions and challenges that result in manufacturers having an imperfect approach to their procurement, because it's often not discussed at a leadership level or included during planning for the financial year ahead.

Serious buying leverage

Helping businesses to innovate within their supply chain is in our DNA. We have helped manufacturers accelerate their financial performance by utilising our knowledge, expertise and our impressive buying power.

EXCLUSIVE RELATIONSHIPS WITH MARKET-LEADING SUPPLIERS

We have nurtured exclusive relationships with a wide range of national, local and best in class suppliers across 100+ different areas of expenditure, thereby building up an impressive buying leverage due to the combined spend of all our clients.

Suppliers that work with Auditel understand that if they maintain a competitive price and adhere to service levels agreements, it is likely to lead to further opportunities from other Auditel clients. This means you can gain access to our unique pricing frameworks that would be unattainable if negotiating by yourself, resulting in best value for money, while remaining completely independent and impartial. The synergy this creates allows us to provide powerful solutions to your current challenges.

Suppliers enjoy working with Auditel because we are aligned to their tendering process. We can clearly present your organisation's profile of spend and service level requirements,

whilst also being aware of the innovation or value-added service that suppliers can provide. This enables the supplier to give their most competitive price because there are no unknowns in the tendering process, ensuring that you get the best deals over the longest term.

Our specialists act as the conduit between you and the supplier, ensuring a smooth implementation and eradicating wasted time for both parties. We work hard to ensure that the supplier relationships result in a 'win-win' for both you and the supplier and we deal with both in a transparent, fair and ethical way.

Our suppliers also take an active part in training and sharing their own knowledge and expertise with our procurement specialists, who, in turn, pass it onto you, so that you can be sure you're always up-to-date with the latest innovations and solutions.

Reagecon

"I would describe the Auditel service as a process that lifts the lid on your cost base, provides detailed proposals on what can be achieved and then presents and manages the implementation of the solution. You are kept up to date and remain in control at all times."

Independent, impartial, transparent

Auditel delivers significant added value for your business at each phase of our engagement. Our end-to-end process enables us to ensure that we understand your needs and find the best value solutions to implement. Our unique process is simple to follow and importantly, we provide the resources to do the work at each step.

EXPERTS AT MANAGING CHANGE

Once engaged, we will work with your management teams to understand your requirements and identify any risks within your supply chain. This ensures that the suppliers we tender are a perfect match with your future business strategy. The more precise we can be with suppliers during the tendering process, the more competitive they will be with their pricing.

Using our bespoke tools, we will conduct a forensic line-by-line analysis of your data to uncover anomalies, patterns of spending and behaviours that were previously unknown. These can then be challenged and corrected to maximise savings and process efficiencies.

Your teams access to our market knowledge, which comes from live data reporting across thousands of tenders. This enables us to quickly judge the competitiveness and quality of any incumbent suppliers. It also allows us to short-list potential alternatives in a fraction of the time it would take you to research independently. Our initial investigations of your past invoices and contracts, ensures that any overcharges are identified and any rebates from your suppliers are recovered.

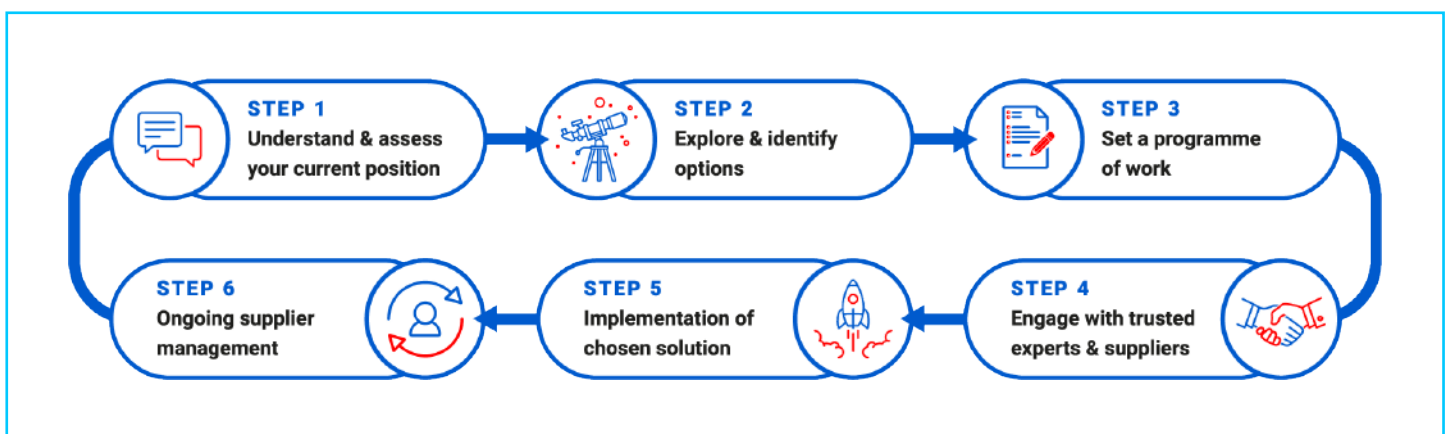

ONGOING SUPPLIER RELATIONSHIP MANAGEMENT

As part of our process, we implement professional supplier relationship management to help align your suppliers with your organisation's aims and objectives. Proactively managing your relationships with suppliers will result in improved communication and innovation from them, which in turn, can help you reach your objectives and maximise value from the supplier over the full course of a contract.

Identified savings found during the tendering process can often be eroded very quickly by several internal and external influences. Suppliers will naturally be looking at ways to increase margin on the account and/or internal staff may make mistakes or fail to follow the procurement processes we have put in place.

We are fully aware of these supplier tactics and challenges and are experts at avoiding these dangers, ensuring realised savings are delivered or exceeded.
